**How to read this report.** Panorama Views, People Activity and Session Activity come from Google Analytics 4, fed by each Kuula tour's [/share/...](#) pages. Engagement Time is the sum of GA4 user engagement duration for the relevant scenes.

**People Activity** counts people recorded across the unit's scenes. **Session Activity** counts browsing sessions. One person may generate multiple sessions, and both measures may repeat across different scenes.

Units are consolidated from every scene whose title carries the unit's exact code (e.g. "Unit B02" and "9HP B02 Interior" both roll into **B02**). Navigation scenes and unlinked duplicate images are excluded from this table, from Spaces Attracting Attention and from the Performance totals above.

Views and visits are not people, and panorama interactions are not hotspot clicks or enquiries. This snapshot does not infer leads, calls or bookings.
